Note: Remarks on appropriate use of forecasted results of operations and other special matters

All statements in this report, other than past factual matters, represent outlooks for projected future results and are in accordance with SANYO's present plans, outlooks, and strategies, based on the judgement of management in light of currently available information.

There are various risks and uncertainties relating to factors that cause changes in business results. The principal factors influencing results include 1) large changes in economic conditions and capital markets, as well as changes in consumption trend in the business segments in which SANYO operates, 2) the effects of changes in exchange rates between the ¥ and the dollar, as well as the ¥ and other currencies, on SANYO's international business activities, 3) Various trade restrictions in the markets of individual countries, and 4) SANYO's ability to provide new technologies, new products and new services amid rapid technological innovation, market competition and price competition.

With respect to this forecast, please refer to "3. Qualitative Information on Forecast for Consolidated Business Results" in "Qualitative Information & Consolidated Financial Statements" for the forward-looking statements.

[Qualitative Information & Consolidated Financial Statements]

1. Qualitative Information on Results of Operations

Overview for the three months ended June 30, 2009 (from April 1, 2009 to June 30, 2009)

During the three months ended June 30, 2009, the global economy continued to show signs of uncertainty about the future due to the deceleration of the economy caused by financial crisis in the previous year, while there were some signs of recovery, such as increasing personal consumption and capital expenditure in China.

In the Japanese economy, while the drop in personal consumption was seen to have bottomed out in some areas, capital expenditure continued to decline and generally harsh conditions prevailed.

Meanwhile, based on the partially revised Mid-term Management Plan, SANYO promoted “Intensive Strengthening of Management Structure” by positioning fiscal 2010 as the year for the establishment of the foundation base for steady growth from the following fiscal year and going forward. In order to transform the cost structure and ensure profitability even in a harsh external environment, sales subsidiaries were integrated to improve the domestic sales structure for the cold-chain business.

At the same time, in promoting “Making Strategic Moves for Future Growth,” SANYO is changing its business structure to enable expedited strategic decision-making regarding businesses and technologies with unique advantages, such as rechargeable batteries for HEVs (hybrid electric vehicles). As part of this initiative, the HEV Division was separated from the Mobile Energy Company and placed under direct control of the Head Office as an independent entity.

Overview of Consolidated Business Results

For the three months ended June 30, 2009, consolidated net sales decreased by 24.7% from the same period of the previous year to ¥361.3 billion. Within that total, domestic sales decreased by 12.8% from the same period of the previous year to ¥146.6 billion, while overseas sales decreased by 31.1% from the same period of the previous year to ¥214.7 billion.

By business segment, in the Consumer business segment, sales of TVs and digital cameras decreased, primarily overseas. As a result, sales decreased by 20.5% from the same period of the previous year to ¥141.6 billion.

In the Commercial business segment, while sales of refrigerated showcases and medical information systems increased, there was a decrease in the sales of commercial air conditioners. As a result, sales decreased by 17.0% from the same period of the previous year to ¥50.5 billion.

In the Component business segment, sales of semiconductors decreased overall whereas sales of rechargeable batteries decreased primarily overseas. As a result, sales decreased by 29.1% from the same period of the previous year to ¥164 billion.

Operating income realized a loss of ¥9 billion, a decrease of ¥14 billion from the same period of the previous year mainly due to a decrease in sales. Income from continuing operations, before taxes for the three months ended June 30, 2009 realized a loss of ¥16.9 billion, a decrease of ¥19.4 billion from the same period of the previous year. Net income attributable to SANYO for the three months ended June 30, 2009 realized a loss of ¥18.4 billion, a decrease of ¥46.6 billion from the same period of the previous year.

2. Qualitative Information on Financial Position

<Assets>

Total assets as of June 30, 2009 were ¥1,448.5 billion, an increase of ¥103.1 billion from the end of the previous fiscal year. This increase was mainly due to a ¥153.4 billion increase in time deposits, while cash decreased ¥56.1 billion from the end of the previous fiscal year.

<Liabilities and SANYO Stockholders' Equity>

Total liabilities as of June 30, 2009 were ¥1,285.2 billion, an increase of ¥111.4 billion from the end of the previous fiscal year. This increase was mainly due to a ¥148.8 billion increase in long-term debt from the end of the previous fiscal year, while the current portion of long-term debt decreased ¥29.3 billion from the end of the previous fiscal year.

Total SANYO stockholders' equity was ¥138.1 billion, a decrease of ¥8.3 billion from the end of the previous fiscal year, due to a ¥18.4 billion increase in accumulated deficit

from the end of the previous fiscal year, while accumulated other comprehensive loss decreased by ¥10.1 billion from the end of the previous fiscal year.

<Cash Flows>

For the three months ended June 30, 2009, net cash used in operating activities amounted to ¥13.2 billion, net cash used in investing activities amounted to ¥13.2 billion, and net cash provided by financial activities amounted to ¥120.2 billion. With the effect of exchange rate changes, cash and cash equivalents as of June 30, 2009 were ¥316.7 billion, an increase of ¥97.3 billion from the end of the previous fiscal year.

3. Qualitative Information on the Forecast of the Consolidated Business Results

The consolidated business forecast for the six months ending September 30, 2009 is as follows:

Forecast of the Consolidated Business Results for the Six Months Ending Sept. 30, 2009

Net sales	¥800 billion ((20.5)% compared to the same period of the previous year)
Operating (loss) income	¥(5) billion (-)
(Loss) income from continuing operations, before taxes	¥(33) billion (-)
Net (loss) income attributable to SANYO	¥(35) billion (-)

* The forecasts above are based on assumptions deemed reasonable at the time they were prepared, actual results may differ significantly from forecasts. Actual results may be influenced but not limited to the following: changes in the political and economic situation in a region, increases in materials prices and fluctuations in the foreign exchange markets.

4. Others

(1) Changes in significant subsidiaries during the period (Changes in specified subsidiaries with a change in the consolidation scope)

(3) Changes in accounting principles, practices, and presentation of consolidated quarterly financial statements

Adoption of FASB Statement No. 160

In December 2007, the FASB issued FASB Statement No. 160, “Noncontrolling Interests in Consolidated Financial Statements - an amendment to ARB No. 51” (“SFAS No. 160”). SFAS No. 160 requires noncontrolling interests (previously referred to as minority interests in subsidiaries) to be reported as a component of equity. SFAS No. 160 has applied prospectively to all noncontrolling interests, including any that arose before the effective date, which became effective for the Company as of April 1, 2009. Accordingly, noncontrolling interests, which were previously referred to as minority interests in subsidiaries and presented between total liabilities and stockholders' equity on the consolidated balance sheets, are now treated as a separate component of equity. The adoption also impacted certain captions previously used on the Consolidated Statement of Operations, largely identifying net income including noncontrolling interest and net income attributable to SANYO. The presentation and disclosure requirements have been adopted retrospectively and prior year amounts in the consolidated financial statements have been adjusted to conform with SFAS No. 160.

Changes in the depreciation method of property, plant and equipment, etc.

Effective April 1, 2009, the Company elected to change the depreciation method of major property, plant and equipment from the declining-balance method to the straight-line method. As a result of analysis made of capital investment plans, production output and sales, the Company believes that this change provides better matching of costs and revenues over the assets' estimated useful lives. In addition, the Company has also reviewed the useful life of property, plant and equipment. As a result, the useful life of assets has been reduced. In accordance with FASB Statement No. 154, “Accounting Changes and Error Corrections – a replacement of APB Opinion No. 20 and FASB Statement No. 3,” a change in depreciation method and review of useful life is treated as a change in accounting estimate, without any restatement of prior period results. The effects of these changes reduced both operating income and income from continuing operations, before taxes by ¥1,689 million.

(Notice Related to Future Outlook)

All statements in this report, other than past factual matters, are future results projected in accordance with SANYO's present plans, outlooks and strategies, based on management judgments in light of information currently available. Therefore, SANYO cannot guarantee the accuracy and reliability of this information, and requests that you should not rely on this information alone.

There are various factors influencing business forecasts such as business risks and uncertainties. The principal factors that may cause changes in the forecasts include: 1) large changes in economic conditions and capital markets, as well as consumption changes in businesses SANYO engages in, 2) the effects on SANYO's international business activities of fluctuation in exchange rates between the yen and the U.S. dollar, as well as the yen and other currencies, 3) various trade restrictions in the markets of individual countries, and 4) SANYO's ability to provide new technologies, new products and new services amid rapid technological innovation, market competition and price competition. However, it should be noted that factors affecting SANYO's performance are not limited to those mentioned above; there are other factors that pose latent risks and uncertainties.
